eKEY for BlackBerry will be Available Soon

Exciting news from GE Security! We are pleased to announce that we will be releasing eKEY Basic for BlackBerry later this month and eKEY Professional will follow in March of 2009.

Pricing for eKEY for BlackBerry will be the same as the current eKEY prices. Your board or MLS can provide specific pricing details. The eKEY solution will work on the following BlackBerry devices: Pearl, Curve, Pearl Flip, Bold, 8800 series, and the Storm. Specific product details can be viewed by visiting www.gesecurity.com/blackberry.

eKEY for BlackBerry will require the use of a small piece of hardware called the eKEY Fob. The fob will translate the Bluetooth in the BlackBerry to Infrared in the iBox. This piece is required because BlackBerry devices do not have an Infrared Port.

Fobs can be purchased for \$49.95 plus shipping. An order form and ordering instructions can be found on page two of this document. The fobs are currently in limited supply and orders will be filled on a first come, first served basis.

If you are interested in getting a new BlackBerry to use as an eKEY, RIM (the makers of BlackBerry) have put together an offer for a free fob. **This offer is only available online and can be seen by clicking [here](#).** The offer is being made by RIM, and they are using a third party to manage this offer website. When a new BlackBerry and service are purchased through this site, a free eKEY Fob will be sent to you.

Please note that currently the fobs are in limited supply, thus it could delay shipment of the free fob. This is an independent offer and the device and service prices should be compared with offers from competing carriers and other retail stores.

When eKEY for BlackBerry is released, you will be able to download the application at www.ekeymobile.com directly to your BlackBerry. Your board or MLS can provide you with an authorization code to complete the installation process. A detailed explanation of the download process can be obtained by viewing the [eKEY for BlackBerry QuickStart Guide](#).
